PHIL 203 - THE ARABIAN NIGHTS

Arabian Nights, or as it is sometimes called, One Thousand and One Nights, is one of the great works of world literature. Its influence in both the Arabic world and the west has been immense. But do the many stories that make it up have a common theme? Those stories are told by a young woman, Scheherazade, to keep herself alive. If the king loses interest in the stories she tells each night, he will have her executed; every night is thus a test she must pass. The imaginative stories range over themes that are of the utmost importance in thinking about what the nature of human beings is, ranging from justice to liberty to equality to knowledge to happiness. But if there is one theme that dominates the work it is despotism, and how to combat it. The stories are relatively short, and a joy to read.

PHIL 350 - PHILOSOPHY IN FILM

Every film presents to its audience a world and a way of sensing and thinking about that world. Cinema possesses what we might call a thought-function: cinema incites us to think, to think through and with the diverse worlds presented in films. To the extent that philosophy consists in an effort to think clearly and rigorously about the world and the problems it comprises, it follows that there is much of philosophical interest in cinema. In this class, then, we will attend to cinema's thought-function, endeavoring to think philosophically about cinema—and even, perhaps, to think cinematically about philosophy.
