

ACCELERATED

Accelerated programs allow students to complete an undergraduate and graduate degree typically in 5 years, saving money and time. Students enroll in a specified set of 3 graduate courses to count for both the undergraduate and graduate degree requirements in their senior year.

The remaining graduate courses can be completed in one calendar year.

NOTE: Some graduate programs, in and of themselves, can be completed in one calendar year. These are not considered part of the accelerated programs.

Eligibility: The majority of students are eligible to apply for an accelerated program *after* completing 75 credit hours and *before* completing 90 credit hours. The ideal time to apply is at the end of 1st-semester junior year in time to register for senior year courses in the 2nd semester of junior year. Please consult your advisor for final eligibility.

Process: Students meet with their advisor and the respective graduate program director. If admitted to the accelerated program, the student will register for the 3 graduate courses and formally apply to the graduate program.

Notes:

- Graduate-level courses taken during the undergraduate degree must be completed with a grade of **B (3.0)** or higher (B, B+, A-, or A) to be applied toward the graduate degree.
- If a student does **not** earn a B or better, the course may still count toward the **undergraduate degree**, but it will **not** be applied to the graduate program.
- Graduate-level courses should be completed during the student's **senior year (90–120 earned credits)**.
- Admission to the graduate program is **conditional upon successful completion** of the undergraduate degree.
- Graduate credits taken during the undergraduate program are treated as **transfer credit** and are subject to the university's **Transfer Credit Policy**.
